Jadever AGT-C: A hardy scale for all conditions, from a trusted brand

To put it simply, the AGT-C is one of **Marsden's biggest-selling scales** from both our floor scales and bench scales ranges.

A trusted, high quality name - **Jadever** - coupled with **IP68-certified waterproof** protection make the AGT-C the scale of choice for countless breweries, dairy farms, fishmongers and food processing plants.

IP68 waterproof protection

The key selling point of the AGT-C - and the reason why most people buy it - is its IP68 rating. This means the scale is **waterproof** and can withstand washing down, hosing down and regularly getting wet from produce that's being weighed on the scale.

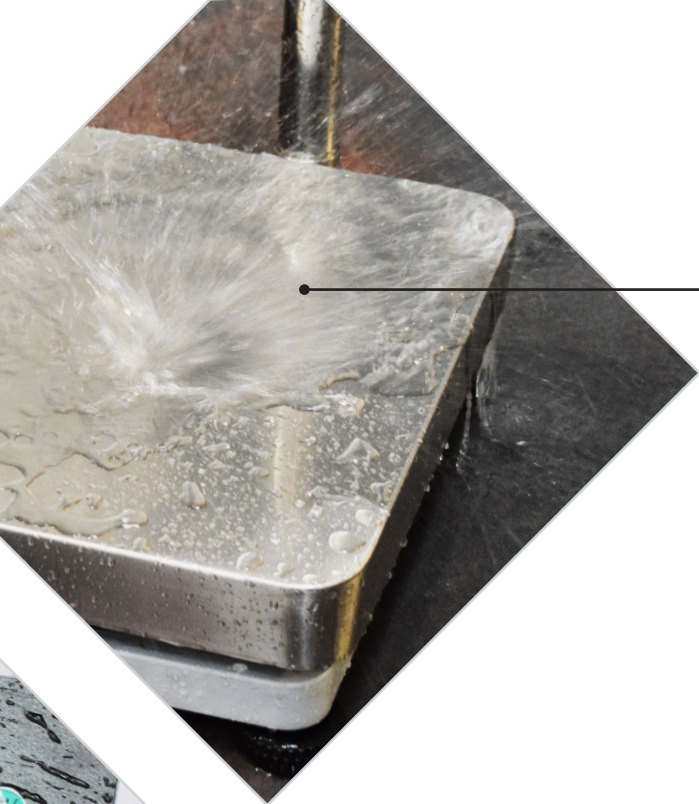

A stainless steel scale - with a removable **304 food grade** platter - the AGT-C has **encapsulated loadcells** for extra protection against water.

A choice of capacities and base sizes

The AGT-C's indicator is on a column, with the base available in two sizes.

You can also choose from **capacity options ranging from 15kg to 150kg**. Remember, the lower the capacity the more precise the graduations - if you're weighing smaller items - for example where the 15kg capacity option will suffice - **accuracy is as impressive as 1g**.

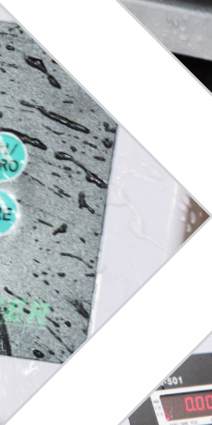

Perfect for when you need to keep you scale clean and hygienic

With IP68-certified protection, the waterproof AGT-C is the perfect scale if you work in an environment that needs everything kept clean and hygienic.

A stainless steel scale is easier to keep clean than a mild steel one, and you don't need to worry about water ingress with the AGT-C. Plus, stainless steel, on average, lasts longer than mild steel.

Key features

- IP68 waterproof rating
- Removable stainless steel platter
- Bright red LED display
- Encapsulated loadcells
- Powered by rechargeable battery
- Adaptor supplied
- Hi/lo alarm
- Tare

Rechargeable battery for extra flexibility
