Marsden M-400: A 2-in-1 scale for weighing babies and toddlers

For midwives and health visitors who need to weigh babies as well as young children, the M-400 is perfect.

A **secure slide on/off baby bowl** makes weighing babies easy; remove the baby bowl and the weighing platform can accommodate children who wish to stand on the scale.

Plus, like all of the scales that are part of Marsden's M-4XX series, it's **highly robust** and very **easy to use**.

Robust and built to last

The M-400 has been over-engineered to be as **robust as possible**.

Many Class III Approved floor scale manufacturers compromise build quality and robustness in order to make their scales as light as possible.

However, we've chosen to create a scale that will **withstand years of constant use**, thanks to centrally-mounted load cells and a hardened, powder-coated steel casing.

Weigh babies and toddlers up to Age 3

There are few baby scales available that offer the flexibility of the M-400.

With a 20kg capacity and a stand-on weighing platform available, the M-400 could weigh children up to Age 3.

For babies, simply slide the plastic baby bowl on, and you're ready to weigh.

Easy to use features

The M-400 has a number of easy-access features to make weighing even quicker.

For example, Tare will allow you to remove unwanted weight. For example, if you are using a blanket or swaddling, you can remove this weight from the display, to get a true reading of the baby's weight.

Hold will allow the scale to stabilise the weight reading, even if the baby or child is moving on the scale.

Key features

Mains operated or batteries
Slide on/off baby bowl
Highly robust
Large, bright display
Adjustable levelling feet
Hold/Tare

Use it anywhere

The lightweight M-400 can be used absolutely anywhere - because it can be powered by AA batteries (which will provide **up to 80 hours' continuous use**).

Plus, a **carry case or rucksack** is available for easy transportation. This can simply be selected when placing your order through our website.

Specification

Class: III
Capacity: 20kg
Graduations: 5g <10kg> 10g
Power: Mains adaptor (optional extra) or 6x AA batteries
Dimensions: 320mm x 310mm x 120mm
Weight of Scale: Approx. 3.7kg

Optional Extras

Carry case (CC-400)
Rucksack (RK-400)
Digital height measure
Bluetooth connectivity
