Marsden M-605:

A versatile hoist attachment for flexible patient weighing

The Marsden M-605 is a lightweight and portable hoist weighing attachment designed for use within care homes and the community.

Accurate weighing for bed-bound patients

The M-605 is an easy to use Class III hoist weighing attachment designed for use on larger hoists with coat hanger shaped spreader bars. It is wider than our standard M-600 hoist weighing attachment.

This hoist weighing scale is designed to clip onto your coat-hanger shaped spreader bar easily. The clear, digital display shows the weight of the patient to the nearest 100g, up to a capacity of 200kg.

Hoist weighing attachments are now required by MHRA to be approved under the Medical Devices Directive (93/42/EEC). The Marsden M-600 and M-605 are now MDD approved making them the only hoist weighing attachments that are legal for use in the UK.

Class III and MDD approved hoist attachment

Easy to use function keys

Optional carry case

Suits most 'coathanger' sling supports

Record weight data easily

As well as Hold and Tare functions for clear and accurate weight readings, this scale is available with Bluetooth.

Bluetooth connectivity allows the weight data to be instantly, wirelessly transferred from the scale to a central database, PC or handheld device.

A printer can also be connected to this scale to provide a printed record of the patient's weight, height and BMI reading along with the date and time the readings were taken.

Built to last

Like other scales in the Marsden range the M-605 is built to last. It comes with a two year warranty, and for extra peace of mind it can be kept accurate and reliable with a Marsden service contract.

Product Specifications

Capacity: 200kg
Graduations: 100g
Weight of scale: 6.7kg
Power Supply: Mains/Rechargeable Battery
Dimensions: 730 x 275 x 160mm

Optional Extras:

Carry Case
Thermal Printer

Accuracy Assured
