Marsden M-650/M-651/M-652/M-653:

Wheelchair scales for every requirement

The M-65x range makes weighing wheelchair-bound patients easy. Choose a standard platform, or options with sturdy handrails for those patients who wish to stand, but need support.

One weighing scale: four solutions

The Marsden M-65x range of wheelchair scales are a versatile way to weigh wheelchair-bound patients. Simply choose the solution that best fits your needs – and you have a durable, accurate, Class III Approved weighing scale!

Choose the M-650 if you need a low-profile, heavy-duty weighing scale for patients in wheelchairs. The separate indicator can be handheld or wall mounted.

The M-651 adds an indicator column. This means your wheelchair scale acts as a more permanent fixture in your hospital or care home, with the indicator conveniently closer to eye level.

For greater versatility, the M-652 adds handrails. Your wheelchair weigher now doubles as an easy-access scale for geriatric and bariatric patients who wish to stand, but need a bit of support.

The M-653 has a single handrail if two are not needed.

M-650 with separate indicator

M-652 with handrails

M-651 with indicator column

M-653 with single handrail

Easy to use

Whichever option you choose the M-65x range is very easy to use. Each option has a capacity of 300kg, with accuracy to 100g.

The indicator has two displays which show weight, height and BMI. By using the full numeric keypad height can be manually entered to calculate the BMI.

The M-65x range has Tare and Pre-set Tare so that the weight of the wheelchair is deducted before weighing the patient.

All options come with wheels and a handle, meaning they can be stored away when not in use.

A printer can be added for a permanent record of the patient's weight, height and BMI data. Alternatively, weight data can be wirelessly transferred to a central database instantly with optional Bluetooth, or USB connectivity.

Built to last

Like other scales in the Marsden range the M-65x range is built to last. Each option comes with two years' warranty, and for extra peace of mind a Marsden service contract can be purchased: providing the minimum recommended re-calibration intervals of 12 months.

Product Specifications

Capacity: 300kg
Graduations: 100g
Weight of scale: 28.6kg
Power Supply: Mains/Rechargeable Battery
Dimensions: 1150 x 800 x 66mm

Optional Extras:

USB Connectivity
Bluetooth Connectivity
Thermal Printer
