## Marsden OCS-L:

### Marsden hanging balance scale for simple suspension weighing

The Marsden OCS-L hanging/crane scale provides the most efficient, simple solution to suspension weighing.

#### Why the OCS-L?

The OCS-L is an ultra-lightweight aluminium crane scale with a wide range of capacities - from 30kg to 300kg - and accuracies.

This hanging scale is widely used in post offices, freight depots and sorting and collection centres.

To help ensure the longevity and accuracy of this scale it is fitted with an overload alarm which will sound when the scale is reaching maximum capacity.

The hook and shackle on the OCS-L are constructed of stainless steel to provide strength and durability.

Aluminium crane scale

Choose a capacity from 30kg to 300kg

## OCS-L Features

Powered by AA batteries this is a truly portable weighing solution.

With fresh batteries this scale can work continuously for over 120 hours. To prolong the already impressive battery life the OCS-L comes with an auto-power down function that will shut the scale down after it has been sat idle for a set amount of time.

Hold, Tare and Zero features come as standard to help ensure that accurate and reliable weighing results are provided each and every time.

The OCS-L has a large bright red LED display to aid visibility from long distances or in poor lighting conditions.

## Built to last

Like other crane scales in the Marsden range the OCS-L is built to last. This highly durable scale is backed by a one-year warranty.

To ensure reliability and accuracy with every weigh a service contract can be purchased.

## Product specification

Capacity: 3kg - 30kg

Graduations: 0.01kg - 0.1kg

Power Supply: Batteries

Accuracy Assured
